TECHNICAL SKILLS

- **4+ Years Programming Knowledge** across academic and project-based development in C, C++, Java, HTML, and Python
- **Programming Languages and Software:** C, Java, C++, Python
- **Tools & Frameworks:** Linux, Git, VS Code, Eclipse, NetBeans, Unity, Blender, React
- **Cloud Computing:** Azure, AWS
- **Other:** GitHub, GitLab, Word, Excel, PowerPoint

WORK EXPERIENCE

Sales Representative (*Full-Time*)

May 2026 – Present

Aventas Inc., Etobicoke, ON

- Generated over \$1,000 in commission consecutively each week by prospecting, consulting with homeowners, and closing sales for TELUS mobility, internet, TV, and smart home security solutions.
- Traveled across multiple cities in Ontario on sales campaigns, quickly adapting to new markets while consistently meeting and exceeding performance targets.
- Mentored and trained new sales representatives on prospecting techniques, communication, objection handling, and closing strategies, helping accelerate their onboarding and sales performance.

Summer Student – Social Work (*Full-Time*)

July – August 2026

Seraj Society, Mississauga, ON

- Welcomed and assisted clients at the front reception desk, serving as an initial point of contact while supporting intake, registration, and referrals to appropriate programs and services.
- Supported food bank and donation services by reviewing required documentation, maintaining accurate client records, and documenting distributed items for individuals and families.
- Used Microsoft Excel and Google Sheets to organize administrative records and staff information while collaborating with multiple departments to support daily operations.

Administrative Support, Office and IT (*Full-Time*)

May – Aug 2024

PCHS (Punjabi Community Health Services), Brampton, ON

- Assisted in configuring and deploying work phones and laptops integrated with cloud systems using Apple Business Manager and Microsoft Intune.
- Provisioned and managed user accounts, device enrollment, and access permissions, supporting secure authentication and identity management workflows.
- Supported endpoint security and network access control, enforcing password policies, account provisioning, and secure authentication while troubleshooting device and connectivity issues.

Server (*Part-Time*)

June 2022 – Aug 2024

Moxies Courtneypark, Mississauga, ON

- Operated effectively in high-pressure, fast-paced environments, responding to guest requests quickly and accurately while managing an electronic seating system for 100+ guests daily.
- Demonstrated quick decision-making and multitasking while coordinating with up to 5 servers, prioritizing tasks, and resolving real-time issues to maintain consistent service for 500+ guests weekly during peak hours.

EDUCATION

Bachelor of Computer Science (Honours) with Software Engineering (Co-op)

Sept 2021 – Present

University of Windsor, Windsor, ON

- Software Development/Verification and Testing
- System Programming
- Design & Analysis of Computer Algorithms
- Obj-Oriented Software Analysis
- Computer Architecture (Digital Design)
- Artificial Intelligence Concepts

RELATED PROJECTS

Human-Machine Interaction with Automobiles (*Unity, Figma*)

Jan 2026 – Present

- Designing and prototyping automotive infotainment interfaces for digital dashboards and vehicle control systems.
- Developing interactive HMI prototypes in Unity using UI layouts designed in Figma, simulating real vehicle interface behavior.
- Collaborating in a team to research automotive UX standards and test interface concepts before deployment on proprietary automotive hardware.
- Applying human-computer interaction principles to minimize driver cognitive load and improve usability and safety.

3D Interactive Environment – Nordic Dining Room (*Java, Blender*)

Apr 2025

- Built an interactive 3D environment by integrating Blender-modeled .obj assets into a Java-based engine, implementing smooth camera controls, navigation, and stair interaction.
- Loaded and rendered 3D .obj models from Blender into a Java environment with texture mapping and camera navigation.
- Applied object-oriented design and Scrum practices to deliver modular, scalable code with optimized rendering and asset management.

Open Data Management Tool – City of Windsor (*Java*)

Nov 2024

- Developed a Java-based data management system to catalog and query municipal open datasets, improving data retrieval efficiency and supporting usage analytics.
- Implemented core functionalities, including advanced data query capabilities, usage analytics, and growth tracking for data sets.
- Constructed modular components to support scalable indexing and retrieval of municipal datasets.

University of Windsor Website Concept (*HTML, CSS, PHP*)

Jan 2024

- Developed a responsive university website using HTML, CSS, and PHP, creating structured web pages for courses, tutorials, and resources, enhancing accessibility for users.
- Implemented server-side scripts for email communication and file uploads, optimized the design for responsiveness, and utilized clean, modular code for maintainability and scalability.
